Rules for integrands of the form $(c + dx)^m (a + b Sinh[e + fx])^n$

N: $\int u^m (a + b \sinh[v])^n dx \text{ when } u = c + dx \wedge v = e + fx$

- Derivation: Algebraic normalization
- Rule: If $u = c + dx \wedge v = e + fx$, then

$$\int\!\!u^m\;(a+b\,Sinh[v])^n\,dx\;\to\;\int(c+d\,x)^m\;(a+b\,Sinh[e+f\,x])^n\,dx$$

Program code:

```
Int[u_^m_.*(a_.+b_.*Sinh[v_])^n_.,x_Symbol] :=
   Int[ExpandToSum[u,x]^m*(a+b*Sinh[ExpandToSum[v,x]])^n,x] /;
FreeQ[{a,b,m,n},x] && LinearQ[{u,v},x] && Not[LinearMatchQ[{u,v},x]]

Int[u_^m_.*(a_.+b_.*Cosh[v_])^n_.,x_Symbol] :=
   Int[ExpandToSum[u,x]^m*(a+b*Cosh[ExpandToSum[v,x]])^n,x] /;
FreeQ[{a,b,m,n},x] && LinearQ[{u,v},x] && Not[LinearMatchQ[{u,v},x]]
```
